

# Performant 88 Premium

Aesthetics. Comfort. Luminosity.

It is the window with the most advantages, long-lasting, that follows the current design trends and has the best thermal insulation. It is for those who prefer the aesthetics of aluminum but who, likewise, want to take advantage of the benefits of PVC profiles, more precisely the exceptional thermal and sound insulation. Performance 88 Premium comes with a larger glazing surface than any other window, both due to the 52mm glass packages and thanks of the design of the profile that can have the frame hid in the structure of the construction, respectively of the alignment between the frame and the sash.

0.74 W/(m²K)

47 dB

 **THERMAL INSULATION**  
**0.74** W/(m²K)

 **SOUND INSULATION**  
**47** dB

**100% RECYCLABLE**  
**5 YEARS WARRANTY**

- 1** PVC 7-chamber coplanar aluminium clad profile with 93.5 mm constructive depth. Extra middle gasket in profile to increase thermal insulation
- 2** Maximum opening window size: 1000x2500 mm
- 3** Option of profile with foam in the reinforcement chambers of the frame and sash that ensures exceptional thermal insulation
- 4** Glass: standard 3 sheets with a thickness of 52 mm. Special reinforcement in profile that supports heavy glass weights
- 5** Gaskets: 3 + 1 under the glass package
- 6** Glass package rod: Aluminium or Warm Edge

Design with countless options for these windows due to the many aesthetic possibilities: the choice of color from an almost unlimited range due to the aluminum plating, the alignment between the frame and the sash that offers linearity to the window and the possibility of burying the frame in the masonry for even more elegance.

Glass options: 4 seasons, anti-burglary, secure, variety of frosted and decorative glass.

Colours: white, wood textures, mat, metallic or bicolour (the RAL range for the exterior).

Hardware available in various shapes and colours, assorted handles and hinges, hidden hinges.

Seals colour grey or black.
